

How Students Participate in Threaded Discussions

Step 1	Click on the <i>Discussion Topic</i> link.
Step 2	<p>Before you are able to read the messages in threaded discussion view, you may need to click the drop down arrow and select “Display replies in threaded form” as shown below. The other drop down options are also quite handy.</p> 
Step 2	Make sure you read all the posts before you develop your reply.
Step 3	<p>Click the “REPLY” link to the bottom right of the student’s post to which you will reply. Then click in the space provided to type your response.</p> <p>[Note: Moodle does not have spell check. So read your response out loud and review it carefully before you send it.]</p>
Step 4	<p>When you are ready to send your message, click "Post to forum."</p> <p>[Note: After you send your message, you will have 30 minutes to revise and resend it if necessary. But keep in mind that someone could read the first version before you post your second version.]</p>
